

Navajo Abandoned Uranium Mine

Site Screen Report

This form is for use at the site of abandoned uranium mines (AUM) located on Navajo Nation lands. Applicable sites include all mine and mine features that have or have not undergone reclamation by the Navajo Abandoned Mine Lands Reclamation Program, including features, adits, pits and waste piles. Applicable sites also include all AUM sites listed in the USEPA CERCLIS database, all sites listed in the 2008 AUM GIS Report issued by USACOE and USEPA, all AUM sites on allotment lands associated with the Navajo Nation, and any and all AUM sites not listed in any database located on Navajo lands. Reconnaissance of any sites located on lands adjacent to Navajo lands that may be impacting Navajo lands will need to be coordinated with the authorities appropriate to those lands.

The purpose of the form is to ascertain the status and location of the identified AUM site, and record all immediate site information associated with the mine site. Decisions and recommendations on what additional steps are needed will be provided on a separate document.

Mine Name: Black Rock Trench
Mine ID: 250

Navajo AUM North Central Region

Prepared by:

Weston Solutions, Inc.

Contract: W91238-06-F-0083

20074.063.039.0020

April 2012

Part I Site Identification, Location and Status

Site Names and ID numbers as applicable

Mine ID: 250

Map ID: NC51

CERCLIS: NNN000909270

Navajo Abandoned Mine Land Reclamation Program: NA-0209

Local name / Aliases: Black Rock Mine

Chapter and local area: Oljato

County: Navajo **State:** AZ

Lat/Long: 36.8858433194 N / -110.247647742 W

Nearby road and highway: Route 163 **Local Post Office:** Kayenta, AZ

Surface Land Status: check one or more and provide ownership and contact information below

Tribal Trust Land
Private
Bureau of Land Mgmt
State

Public lands
Tribal Fee Land
Allotment
Fee land

Subsurface Mineral Rights:

No information on subsurface mineral rights ownership was found in the EPA/AUM Database.

Claim and operator information:

Historical documents identified the operator of the mine in 1954 as Jack Crank, and from 1954 to 1955 as Charles L. Spencer and C.C. Mumma. No additional historical ownership / lease information was identified in the EPA / AUM database.

Number of residential structures within 200 feet of mine: No

Part II Summary of Radiological Readings

Mine ID: 250

Highest gamma radiation measurement: 23,194 counts per minute (cpm)

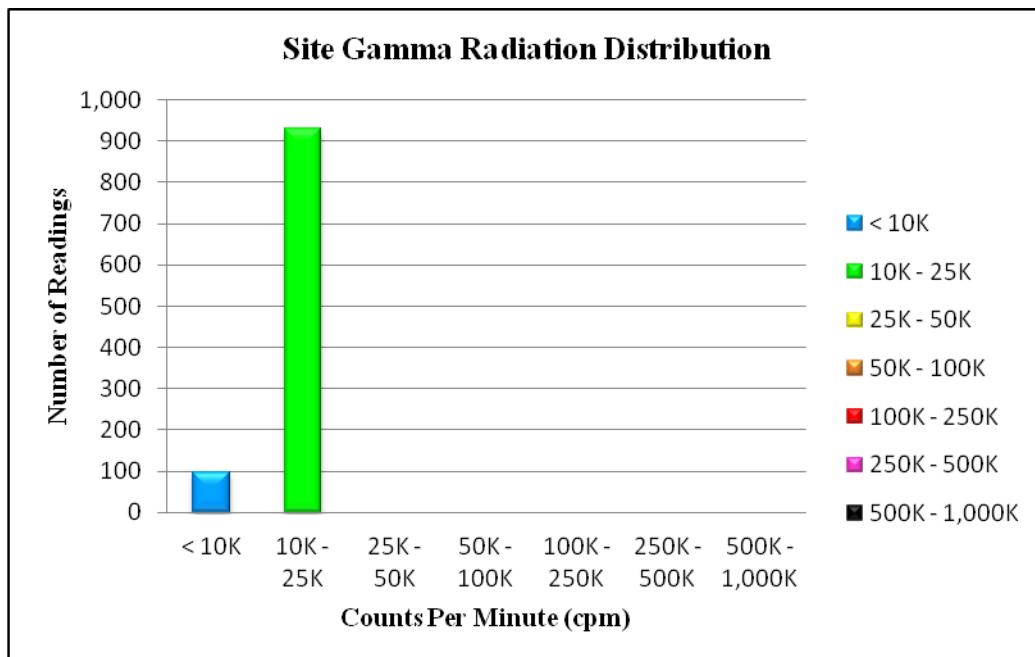

Background Average: 7,697 cpm **Two Times Background:** 15,394 cpm

Describe any other radiological measurements:

A total of 1,026 gamma radiation measurements were collected from the mine site, ranging from 6,422 cpm to 23,194 cpm. Maximum levels of approximately 20,000 cpm were found near the reclamation cap. The measurements are represented in Figures 1 and 2.

Distribution Chart and Statistics:

Site Gamma Radiation Statistics	
Number of Readings	1,026
Minimum (cpm)	6,422
Maximum (cpm)	23,194
Mean (cpm)	12,741
Median (cpm)	12,643
Standard Deviation	2,330

Part III Status of Reclamation and Mine Waste

Mine ID: 250

The following information was obtained from the Navajo Abandoned Mine Land Reclamation Program (NAMLRP) Point Features Database:

NAMLRP Status of the mine site: Reclaimed: Yes Waste Pile onsite: No

NAMLRP Project Number: NA-0209

NAMLRP Mine features: 1 Rim Strip / Pit

The following information was obtained from field observations collected during the 2011 site screening:

Provide description and status of all mine sites and features at site. Include all waste piles, adits, pits and other features, and indicate whether they are open, closed, covered, capped, buried or unreclaimed. Indicate approximate size, shape and extent, including description of any reclamation caps. Note condition of all caps.

Observed reclamation work and status:

Adits:

None Observed

Waste Piles:

None Observed

Pits:

None Observed

Shafts:

None Observed

Other Debris and Mine Features:

Reclamation cap, red clay, 150' diameter

Part IV Site Observations and Environs**Observed Residential Structures (number and human habitation status of structures at the following distances from the mine site):**

0 to 200 feet: None Observed

200 feet to 0.25 mile: 0.25 mi N - Residential compound, with multiple structures

Observed Public or Commercial Structures (schools, clinics, Chapter Houses, places of business and any other structures used by members of the community at the following distances from the mine site):

0 to 200 feet: None observed

200 feet to 0.25 mile: None observed

Levels measured around the perimeter(s) of the identified structure(s):

Background Levels

Observed Water Sources (number and type of wells and surface water sources that are potentially used for human consumption at the following distances from the mine site):

0 to 0.25 miles: None Observed

0.25 miles to 4 miles: None Observed

Sensitive Environments (all sensitive environments located within visible range of the mine site, including: wetlands, endangered species, habitats and approximate locations of sites that may be under protection of the government of the Navajo Nation):

None observed

Known Site History (information from interviews with Chapter officials and residents and database review, includes: mine ownership, type of mining operation, period of operation, known amount of production, and any other information provided):

The Black Rock Trench mine claim consists of an area of 2,628 m². No additional historical ownership / lease information was identified in the EPA / AUM database.

Part V Response Action Summary

Summary of Evaluation Factors:

Accessibility:

Was the mine easily accessible to potential human activity?

Yes

Radiological Measurements:

Were any gamma radiation measurements collected at the mine greater than two times the site-specific background levels?

Yes

Waste Piles:

Were any unreclaimed waste piles observed at the mine with gamma radiation measurements greater than two times the site-specific background levels?

No

Structures:

Were any structures observed within 200 feet of the mine?

No

Potential Drinking Water Sources:

Were any potential drinking water sources observed within 4 miles of the mine?

No

Reclamation:

Was the mine reported to be previously reclaimed, or did the mine appear to be reclaimed?

Yes
